Subject: UPDATE: USVI Limetree Terminal USACE CWA Permit
Attachments: Limetree Terminal PN - USACE Comment Letter (Dec 29 2017).pdf

Saludos Pete! As discussed during yesterday's Senior Staff meeting, here is the latest update we have regarding the Limetree Terminal USACE CWA Construction Permit.

- On December 29, 2017, EPA sent its comments to the USACE (see attachment). These comments were also forwarded to the applicant.
- On February 6, 2018, EPA received clarification from the USACE stating that the currently active authorization for the Limetree Single Point Mooring System project in Saint Croix was issued under Nationwide Permit No. 6. This authorization only covers survey and assessment activities related to the proposed project, and does not constitute an authorization for the proposed construction of the mooring project.
- The complete single-point mooring project is still being evaluated by the Corps, and information gathered from the authorized surveys will be needed in order to issue a final determination regarding the full project.
- On Tuesday, March 27, EPA communicated with Sindulfo Castillo, Regulatory Chief for the Antilles USACE Office, and the project is still under evaluation by the USACE, as they are still waiting for comments from other Federal agencies.

Please let us know if you need any additional information. We will keep you updated if we receive any new updates regarding this case.

Thanks,
Carmen
